

Patient Reference Group

Building the Leeds Digital Way

Creating new hospitals and systems that work for our communities.

This session will provide a little background on the work we are doing to create a digital hospital of the future here in Leeds.

Almost every part of our day is touched by digital technologies and there are many amazing opportunities to extend these technologies into the way we deliver healthcare.

We have created 'fictional characters' which describe a typical patient or community. These personas are based upon people who might visit the new digital hospital and staff and clinicians who might work there. We would like to share a sample of our patient personas with you for discussion. This part of the session will be led by Siobhan Roberts, Engagement Lead working on behalf of LTHT.

Patient Experience Strategy

The session will also include continuing our work together on creating the new patient experience strategy for the Trust which we began at the last Session in October.

Details of this session

The session will be held on MS teams on the **16th of December 13.00-14.30**. Join on your computer or mobile app by using the link below. Please let us know if you are attending- pcpi.ltth@nhs.net
