

## Surgical mask Adaptors

If you need to adjust your surgical mask please use this wipeable plastic gadget (available from procurement)

We have received some generous donations from the public which staff can use but they **must** comply with IPC guidance - this means that they are sessional use only (therefore removed once you have removed your mask for your session) and must be put in a linen bag and washed at 60degrees in line with your uniform as per guidance. This may mean that staff will need more than one.
