

Focused Assessment Record (CoVID-19) is now available on

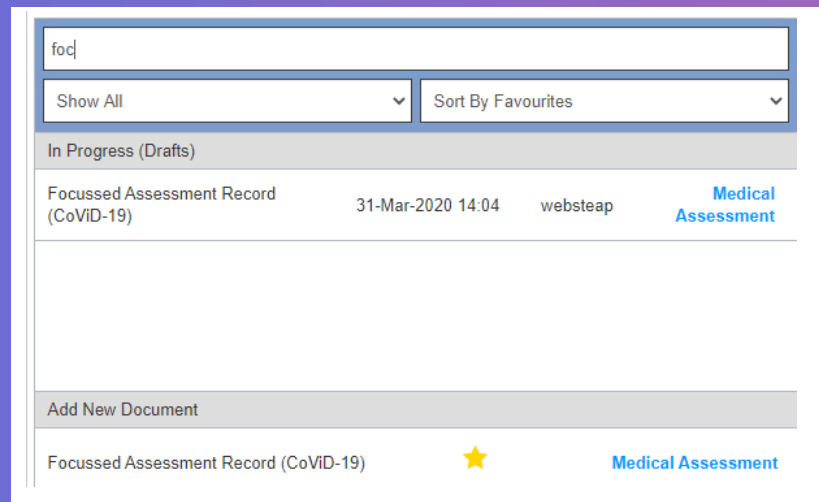

via *Add Clinical Document*

This is a simplified e-clerking document that can be completed on any patients that have presented to the Trust including CoVID-19. It has been designed to be completed on both: **iPads** and **desktop** devices.

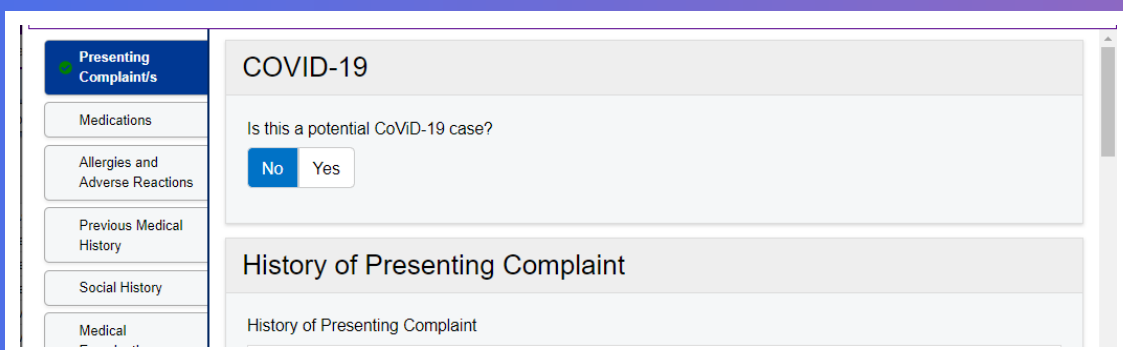

1 From the Single Patient View, go to **Add --> Clinical Document**.

2 Start **typing in the filter** or save as one of your **favourite** documents.

3 Choose whether you are assessing a potential **CoVID-19** case (this **can be changed at any point** in the assessment if it later turns out to be a suspected case). This will alter the fields needing to be collected.

Focused Assessment Record (CoVID-19) is now available on PPM+ via *Add Clinical Document*

4 After completing the assessment, click the **submit** button.

5 If you want to go back and **edit** the form, go to the document in the event list on PPM+ and press edit.

6 If patient handed over to colleagues or a senior review occurs, additional notes should be done using the "**clinical note**". (A "senior clinical note" is currently being developed).
