

# The Senior Review (COVID-19) e-form is now available in PPM+ via Add Clinical Document

The screenshot shows a clinical notes interface. At the top, there is a 'Notes \*' section with a rich text editor containing the following text: 'S-Review of suspected COVID patient', 'B-Diabetes', 'A- Requiring 40% Oxygen by Venturi to maintain oxygen saturations within range', and 'R-Ward level care'. Below this is a note: 'This entry will be added to the overall patient Clinical Note Summary'. The main section is titled 'Please indicate the level of care that is currently recommended for this patient \*' and contains a list of radio button options: 'Palliative treatment', 'Oxygen and supportive treatment' (which is selected and highlighted in green), 'CPAP / Non Invasive ventilation (Not suitable for further escalation)', 'CPAP / Non Invasive ventilation (Consider intubation)', 'Intubation and ventilation', and 'Other level of care'. At the bottom left of the form is a red 'Discard' button.

## WHAT IS IT FOR?
