

Cleft lip +/- palate

Inform mother of likely diagnosis
Assess for associated anomalies

Re-scan by local Obs US specialist <3 working days if expertise available

Offer referral to Leeds FMU <3 working days
Refer to Yorkshire Region Cleft Lip and Palate Service

Accepts

Leeds FMU

- Assessment of palate
- Offer 3D/4D views
- Counsel re: invasive testing for QF-PCR & array-CGH (if not already performed)

Declines

28/40 review with either local obstetric USS specialist or at LGI, depending on woman's preference

Local delivery unless significant further anomalies or airway concerns.
Non-syndromic CL+/-P should not affect mode or timing of delivery.
