

Welcome to Leeds Liver Unit

The Leeds Liver Unit

Leeds Liver Unit (Ward J83) is a 32 bedded ward within the Bexley Wing at St James's Hospital.

The ward comprises of six 4 bedded bays and eight individual side rooms. The ward mainly cares for people with acute and chronic liver disease including liver transplantation and complex hepatobiliary surgery. We also care for a number of individuals from a wide range of other specialities for whom this is not their home ward.

Many of our patients return to us on a regular basis due to the ward being the dedicated supraregional facility for the Yorkshire & Humber region and the North West of England. The Leeds Liver Unit is one of the busiest transplant units within the UK, of which there are seven. Our liver transplant programme serves around 10 million people in the North of England.

Our Ward Team

The Leeds Liver Unit is a growing unit with a large multidisciplinary team consisting of Consultant Hepatologists, Consultant Transplant Surgeons, Transplant Co-ordinators, Enhanced Recovery Nurses, Pharmacists, Dietitians, Physiotherapists, Social Workers and Ward Clerks to name but a few.

The Nursing team on the ward comprises of both registered and unregistered nurses. Patients are also supported by Clinical Nurse Specialists that visit their patients. The Senior Sister Lucy Whiting is supported by Srs. Liz Yates, Rosa Maunganidze and Claire Horsley.

Our vision for our patients to is provide holistic person centred care. We aspire to give great care, putting the person at the heart of everything we do; and as nurses we feel privileged to be caring for and supporting each individual person. We endeavour to incorporate the values of the "Leeds Way" to ensure the delivery of our care is of the highest standard possible.
