

COVID – How Safe Are You?

July 2020

Updated National Guidance for PPE

- COVID 19 in society approx. 1 in 4000
- Patients self isolating at home /careful COVID pre-assessment
- Patients tested before surgery
- **This all makes staff and patients as safe as possible**
- Revised AGP list now only includes respiratory AGPs.
- Respiratory droplet producing procedures – use fluid repellent mask
- You can safely step down from FFP3 to fluid repellent masks for other non respiratory aerosol or droplet generating procedures

No change for COVID +ve patients
