**RE: Compulsory Partial Suspension of UKAS Accreditation to ISO 15198:2012 Standard**

Dear Colleague,

We are writing to inform you, that as of 3<sup>rd</sup> February 2023, the UKAS accreditation in Leeds Genetics Laboratory (LGL), central laboratory for the North East and Yorkshire Genomics Laboratory Hub (NEYGLH), has been partially suspended for molecular genetics activities only. Reassessment of this service is due in the upcoming months, with views of reinstating UKAS accreditation for molecular activities as soon as possible.

**LGL aim to maintain a service producing quality assured results during this period, and this suspension should not have any impact on the diagnostic services delivered.**

We endeavour to deliver services with the most minimal disruption during this time and apologies for any inconvenience caused.

With best wishes,

**Dr Angie Silmon**  
NE&YGLH Operational Director

**Prof Robert Taylor**  
NE&YGLH Scientific Director
